Description

The architectural masterpiece, which is daily admired not only by visitors to the city, but also by citizens of Riga, has been created by the well-known architect Mikhail Eisenstein in 1903. He decorated the facade and interior of the house with rich and luxurious ornaments.

The building stands proudly at the very beginning of Elizabetes Street, on which the finest gems of Art Nouveau architecture, foreign embassies, prestigious offices and financial institutions are located, surrounded by green and well-maintained parks. The Quiet Centre has been known for decades as the most refined and graceful quarter of Riga.

We offer a large commercial space on the ground floor of a historic building. All elements of the exterior and interior are works of art. The luxury entrance, stairs, decorative mouldings on the walls were restored during the renovation of the building. The offered commercial space is equipped for a luxury class office and furnished. It is possible to divide the office into two independent parts, where each of them will retain a complete infrastructure.

Office is located in the most prestigious part of the city – an ideal place for a variety of activities which will satisfy even the most demanding buyers and tenants.
